Supply and Project Management

Professional & Efficient

PDC consultancy installed our office partitions and flooring along with storage racking at our head office in Staffordshire. They are professional and efficient and excellent value so I would not hesitate to recommend the whole team.

BUSINESS INTRODUCTION

LEADING THE WAY IN MEZZANINE FLOOR INSTALLATION

PDC has been installing elevated platforms and office partitions since 2002. We are proud to be the choice supplier of many of the UK's largest chains including Argos, Currys, Homebase and many more. Tailoring mezzanine floors to each of our valued clients specific needs while providing world class service is paramount to our continued success. PDC Managing Director Dean France is committed to continued growth and strength of the business through quality control and best practices.

Excellent Customer Service

Our ethos is that the customer comes first and this applies to clients both large and small, whether it be a simple storage platform, or fully bespoke mezzanine offices then our team will be there for you. Our head office is situated in Staffordshire but we offer national coverage and have

installed Mezzanine Projects throughout the UK. We are proud to have helped thousands of clients expand their businesses. Our dedicated project management team can handle help you through planning, design and construction.

Mezzanine Floors | Staircases | Handrail Systems | Shelving and racking | Suspended ceiling
Office & Industrial Partitioning | Complete Storage and Materials Handling Solutions

Mezzanine Floors

Maximise the potential of your office building, retail premises or industrial workplace with a Mezzanine Floor from PDC! Make the most of any unused height, and you could double your existing floor space. Our flooring and partitions offer the most cost effective solution to realising your building's maximum operating capacity. Our elevated platforms can be designed to support normal office traffic, or heavy machinery for industrial plant use. PDC Consultancy has worked with many of the UK's largest companies for many years. So if you wish to extend your retail trading area, or simply need a small installation for industrial storage, then please get in touch to discuss your project with our experienced team.

With warehouse space at a premium, a mezzanine floor is the most cost effective solution for increasing storage capacity. Freeing up valuable production space or simply extending existing storage is definitely a sensible alternative to moving premises. A storage platform could potentially double your usable warehouse footprint, giving you the freedom to hold more stock items either in light storage, on pallet racking or both.

STORAGE

Mezzanine floors can be designed to take loads of up to 15 Kn/m² with the use of chequer plate or open steel grating. We are also able to design in a single or multiple staircase access, as well as up and over pallet gates and bespoke lifting equipment. PDC have extensive experience of integrating warehouse automation into mezzanine floor designs. We have worked with clients to also install automated warehouse technology.

OFFICES

Installing a mezzanine office or multiple offices is possibly the most cost effective solution for your organisation. PDC are able to design and install many types of raised platform offices, from simple stud partitions to stylish glass sections there is a solution that reflects most budgets and design requirements. DC can also supply everything from office furniture to lighting and suspended ceilings.

RETAIL

Mezzanine for retail are the perfect solution when thinking about creating more space in your retail outlet. If your existing shop has enough headroom then you could almost double your footprint distilling an improved customer experience along with exceptional visual impact. Zoned retail goods create an excellent shopping environment and customer experience that will maximise sales.

Services

Design & Construction

We will assign a dedicated project designer to work closely with each client and project manager. The initial quotation process can be undertaken remotely, but final mezzanine floor design will require a site survey to finalise measurements and accessibility of services. to offer guidance on colour and composition of all visual elements of your project. All of our design work is drawn using CAD and can be presented in either 2D or 3D for project visualisation.

PDC can handle as much or as little of the design and construction process as required. Normal circumstances allows us to handle the entire project. We order all materials and off-site fabrication work against the project timing plan. Everything from nuts & bolts to Rolled Steel Joists is listed on a project inventory and accounted for to minimise on delays and eliminate waste.

FULL SERVICE Project Management

- Design Approval
- Fabrications Ordered
- Materials On-Site
- Installation / Build
- Final Fix & Cosmetics
- Building Control Approval
- Site Left Clean & Tidy

CLIENT TESTIMONIALS

We are proud to be the have worked with many of the UK's largest retail and distribution chains including Argos, Currys, Homebase JD Sports and many more.

Excellent Mezzanine Contractor -

We have commissioned several turnkey mezzanine floor projects and I can say without a shadow of doubt that PDC are one of the best in the business. Every project has been delivered on-time and within budget, highly recommended.

Doubled Storage Space

Before committing to moving we asked PDC to look at a raised platform to lift our offices onto a mezzanine. This opened up the floor space and doubled our storage footprint. We are delighted that we can enjoy continued growth in our existing premises for a fraction of the price.
